

## **Ipswitch Messaging Division Announces Release of IMail Server v11.5**

**Augusta, GA. – March 30, 2011** – Ipswitch Messaging Division, a leading developer of messaging solutions, today announced the release of IMail Server v11.5.

The new release of IMail Server v11.5 adds significant features and functionality to IMail's existing product matrix. In this release customers will find the following major features:

- New Offering: IMail Anti-Virus powered by Commtouch
- New Offering: External Address Verification (Unlimited licenses only)
- New Realtime Whitelists
- New Mailbox Size Report available in Web Administration
- New SMTP Performance Counters
- New Account Harvesting Prevention on POP3 and IMAP
- New Web Client Password Strength Validation
- Updated Daily Report Email
- Updated SSL Configuration Utility
- Updated Ipswitch Instant Messenger Client
- Updated Commtouch Anti-spam Engine (Premium customers only)

"I am extremely happy with this new release," said Tripp Allen, president of Ipswitch Messaging Division. "Our company has proudly maintained the reputation of providing the highest level of customer support and I believe this release reflects our dedication to our customers."

Ipswitch Messaging Division proactively engages customers to learn about specific implementations, customer satisfaction and any obstacles that need to be overcome.

"Having real time conversations with our customers is one of my highest priorities," says Allen. "In fact, this current release provides the messaging market with many of the tools that administrators need to maximize their work-flow and efficiency. That is our primary objective and I am thrilled to know that we are delivering on that promise."

### **About Ipswitch Messaging Division**

Ipswitch Messaging Division delivers crucial communication and collaboration tools without the high acquisition and ongoing administrative costs of systems designed for large enterprises. Millions of people worldwide use Ipswitch Messaging software to communicate via the award-winning [Ipswitch IMail Server](#) and [Ipswitch Instant Messaging](#). Along with an integrated [Commtouch Anti-Spam](#) technology, Ipswitch Messaging delivers secure anti-virus protection from Commtouch, BitDefender and Symantec. Ipswitch IMail Server is designed for companies that want a turnkey collaboration system that includes e-mail, features that plug into Microsoft® Outlook®, plus integrated anti-spam and anti-virus support and an appealing, secure instant-messaging capability all in one server. IMail Server delivers a collaborative set of core features and full-fledged groupware products like its enterprise counterparts at a fraction of the cost. Supported by a world-class team of technical support engineers and customer service representatives, Ipswitch Messaging stands ready to apply its development know-how to help make your organization's messaging initiative a total success.
