

## **Ipswitch Messaging Division Announces Release of IMail Server v12**

**Augusta, GA. – January 31, 2012** – Ipswitch Messaging Division, a leading developer of messaging solutions, today announced the release of IMail Server v12. The new release of IMail Server v12 boasts significant improvements to the IMail Server web client. In this release customers will find the following major features:

- All new tabbed user interface for enhanced usability
- Notes and Tasks are now available with the Web Client to be included with Calendar, Contacts and E-mail for synchronization with Outlook
- Meeting Requests are now available allowing the ability to create and accept using the new Web Client for synchronization with Outlook when IMail Collaboration is in place.
- RSS Feed now available for user's subscriptions.
- New Report Spam feature (*Premium Only*)
- IMail Administrators now have greater capability to customize the web client to their user's needs
- Expanded Contact Information (multiple addresses, websites, personal information, business information)
- Addresses contain link to google maps or the map engine specified by the user
- Photos are now supported and can now be added for contacts
- Web Client user access is now being written to the API Logs
- Lite Web Client to support mobile devices for Email, Contacts, Calendaring, Tasks and Notes
- Easier branding for customizing and displaying company logos, colors, and text
- New Web Client Themes with the ability for customers to create their own themes
- Capability to disable the Web Client Forwarding of user's email
- And much, much more...

"IMail Server has always been known as being an administrator-friendly application," said Tripp Allen, president of Ipswitch Messaging Division. "With IMail Server v12 our goal was to build upon that reputation by delivering a web client that is both highly customizable and extremely intuitive."

Ipswitch Messaging Division continually engages customers to learn their specific product needs. "The idea for a new client was generated from our customer interactions," says Allen. "We learned that customers are decreasing their dependence on desktop applications and are increasing their usage of mobile and web clients. Version 12 begins the process of moving away from an email only web application and adds notes, tasks, RSS feeds, and much more. We've also added a mobile friendly web client allowing access for those mobile devices that do not support push synchronization."

### **About Ipswitch Messaging Division**

Ipswitch Messaging Division delivers crucial communication and collaboration tools without the high acquisition and ongoing administrative costs of systems designed for large enterprises. Millions of people worldwide use Ipswitch Messaging software to communicate via the award-winning Ipswitch IMail Server and Ipswitch Instant Messaging. Along with an integrated Commtouch Anti-Spam technology, Ipswitch Messaging delivers secure anti-virus protection from Commtouch, BitDefender and Symantec.

Ipswitch IMail Server is designed for companies that want a turnkey collaboration system that includes e-mail, features that plug into Microsoft® Outlook®, plus integrated anti-spam and anti-virus support and an appealing, secure instant-messaging capability all in one server. IMail

Server delivers a collaborative set of core features and full-fledged groupware products like its enterprise counterparts at a fraction of the cost. Supported by a world-class team of technical support engineers and customer service representatives, Ipswitch Messaging stands ready to apply its development know-how to help make your organization's messaging initiative a total success.
